

# HKMemory Chest

*The only place to scrap in Hong Kong*

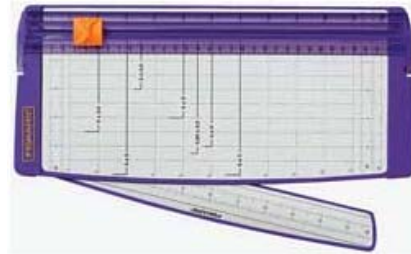

March 2010

## WHAT DO YOU NEED TO GET STARTED.....???

These are the basic tools that you'll need to start this wonderful hobby! There are MANY products on the market; recommendations and trial and error will determine what you personally prefer.

### Cutter

To make sure that you can cut your photos, papers and embellishments consistently straight and without ragged edges, this cutter has been designed as a precision instrument. We stock a European tool, made by Fiskars.

### Scissors

For the fiddly bits and pieces, you need a pair of sharp pointed, end comfort grip scissors. The ones we stock are also from Fiskars.

### Adhesives

There are many different types of adhesive but its best to start with a non-permanent tape glue applied with a runner. This means that you can move your layout around until its to your liking. Our runner is made by Herma and comes with tape inside but you'll need to buy refills when it runs out, which we stock!

***Happy Scrapbooking!***
