Ad5-CMV-p38alpha wildtype

Catalog number: JMAAd-40
Quantity: 0.5 ml

Gene: p38alpha wildtype

Vector Construction: Human cDNA for wildtype p38alpha with 5' flag epitope was cloned into the multiple cloning site of pAC-CMV-pLpA. The resulting plasmid was cotransfected into HEK293 cells with plasmid pJM17 which contains the Ad5 genome. Homologous recombination between the two plasmids resulted in the replacement of the Ad5 early region 1 with the p38alpha expression cassette, generating a replication deficient recombinant virus.

Epitope tag: Flag
QC testing: Western Blot
Titer: Approx 1E8/ml
Supplied As: Crude HEK293 cell lysate.
Storage: Store at -80°C. Multiple freeze/thaw cycles not recommended.
Price: \$450
