

**Non-Toxic!
Environmentally Safe!**

Directions For LayorCare Cleaner Product Use

LayorCare Pre-Treat Cleaner (Acid Free)

- Prepares surfaces for maximum adhesion of LayorCare Sealers.
- Spray surface liberally and scrub to clean. Product will produce a few suds.
- Repeat until area is completely clean.
- Rinse thoroughly when finished.
- Let dry completely before applying LayorCare Sealers.
- Always use full strength--DO NOT DILUTE.
- Covers approximately 300 sq ft/gallon.
- Safe and Non-toxic.

LayorCare Heavy Calcium Releaser (Acid Free)

- Heavy Calcium Releaser may etch some surfaces. Always test in an inconspicuous area first.
- Before applying Releaser, scrub surface of calcium with scrubbing pad or scraper blade to break up first layer of scum.
- Apply product liberally to scrubbed surfaces and let sit several minutes. Product will bubble, showing it is working.
- Scrub the area again, breaking the next layer of scum. Calcium will come off in layers just as it built up.
- Apply product and repeat until area is completely clean of calcium buildup.
- Rinse thoroughly when finished.
- Let dry completely before applying LayorCare Sealers.
- Always use full strength--DO NOT DILUTE.
- Covers approximately 300 sq ft/gallon.
- Safe and Non-toxic.

LayorCare Multi-Blaster (Acid Free)

- Effectively removes efflorescence
- Multi-Blaster will etch concrete and natural stone if left on too long before rinsing. Always test in an inconspicuous area first.
- Apply product liberally and scrub into surface. Let sit several minutes and scrub area.
- Repeat until area is completely clean.
- Rinse thoroughly when finished.
- Let dry completely before applying LayorCare Sealers.
- Always use full strength--DO NOT DILUTE.
- Covers approximately 300 sq ft/gallon.
- Safe and Non-toxic.

WE REIGN. LET IT POUR.
