

Texas Energy Group, LLC Announces New LD Drilling Project!

Texas Energy Group, LLC (TEG) would like to formally announce their new LD Drilling Project located in Liberty County, Texas.

For Immediate Release

Spicewood, Texas – June 16, 2011 - Texas Energy Group, LLC. (TEG) announced today their next drilling venture, the LD Project, which is made up of two prospects, the Quinn and Splendora. Both prospects are vertical wells that will be drilled to 7500' +/- in Liberty County, Texas which is located just outside of Cleveland, Texas.

For the last several years, TEG has been successfully drilling in this area for reserves that have been left behind or simply overlooked in mature active fields.

The Quinn prospect has both the Quinn Sand and Paul Nelson Sand as its primary objectives. Both of these sands have proven to be productive in the immediate area. We estimate the potential reserves for the well at about 1.5 bcf and 120,000 BO.

The Splendora prospect will drill up dip to two wells that produced 190,000 BO from our target zone. Based on the downdip and surrounding production potential reserves of the Mule Pond formation, we estimate this area could produce in excess of 200,000 BO.

Collectively, at today's commodity prices (\$95/bbl & \$4.25/mcf), less severance taxes and royalties, the potential reserve value could be worth **\$26,000,000** +/- to 8/8^{ths} of the partners.

We believe that the prior success we have had in Liberty County gives us an edge, and we are currently developing several additional projects in the area. We will have Private Placement Memorandums ready for review in the next week or so. We plan to drill both wells in August, with quick completion activities in order to create revenue by year's end.

For further information regarding the LD Project, please contact our Investor Relations Department at (877) 893-6749 or visit us on the web at www.TexasEnergyGroup.com.
