

Possession of xenophobia will not be found here for I am no stranger to world travel and negotiations. Assimilation to the myriad of cultures “tout le monde” has been a part of my normal day to day for as long as I can recall. Through flexibility combined with my strong communication, writing and presentation skills; I have gained the ability to interact with and influence all levels within an organization including the ability to partner effectively with outside suppliers, consultants and internal stakeholders. Being confident and self-directed with an entrepreneurial spirit, I have the ability to work well autonomously and also as part of a team. Balancing strategic, detail oriented mindset against my creative abilities allows me to dream while keeping my feet firmly planted thus producing innovative solutions.

As an intellectually precocious youth especially gifted in the math and science fields; I was chosen to partake in various experimental class settings. From grade two, I studied logic and analyzation. In what was considered my seventh grade year, after passing the SATs, I was selected to further my mathematical studies through a specialized program at John Hopkins University. The next year, I was invited to the Naval Academy where sciences, cryptology and other advanced studies were added to my curriculum. By my tenth grade year, I was a full time student at the University of Maryland. International travels lead to my acceptance at Berkshire University in London where I concluded my degrees with a DS in Global Business Management.

Not to sound ostentatious but this bellwether executive possesses in excess of twenty years in the transportation industry with Multimodal experience in broad range of Industries: petroleum, chemical, oil field, cryogenic, hazmat including medical and high level radioactive waste, CCM / temperature control, liquid and dry bulk, JIT/expedited, air freight, TL/LTL, dry, FAK, food, general commodities, cement, intermodal, electronics, high value, over-size / heavy haul and flatbed.
