

A Direct Retrofit with Immediate Energy Savings!

Trying to save energy while being asked to spend less? Connexion has a solution...

Without having to change out your fixtures you can now change your 1000W, 400W, 250W, or 175W metal halide lighting to a more energy efficient technology!

Philips Energy Advantage CDM lamps with AllStart Technology

is a high-efficiency protected "O" rated CDM lighting solution that provides energy savings without compromising light quality.

Benefits

- Crisp white light.
- Excellent color rendering of CRI \geq 85.
- Energy saving solution - without changing a ballast or fixture.
- Reduced maintenance and recycling costs.
- Simplify and reduce your lamp inventory.

Features

- Direct retrofit lamp to **both probe and pulse start** magnetic ballasts.
- A true universal operation that does not affect lamp life.
- Energy savings up to 18%*
- Dimmable to 70% power.
- Long life \geq 24,000 hrs rated average life.
- 80% lumen maintenance
- Available in multiple wattages, clear and coated bulb finishes.

*330W CDM lamp with AllStart Technology compared to 400W quartz metal halide lamp.

PHILIPS

sense and simplicity

Applications

- Ideal for high-ceiling industrial, retail and distribution centers as well as outdoor applications.

Saving energy doesn't have to be expensive.

No matter how complex your lighting system or facility needs are, Philips and Connexion has a energy savings solution to fit any budget.
