Electrical - Plumbing - Heating - Gas - Air Conditioning - Water Filtration

Drying out in the Summer Heat?

Let us help refresh your home with clean water and cool air!

AUGUST NEWSLETTER

Summer is beautiful here in the Lakes Region, and it certainly can be *HOT!*

Did you know that when we are just 1% dehydrated, we begin to thirst, and when we are thirsty, our energy significantly decreases, affecting our ability to work?

Water is imperative to our health especially as it helps to regulate our body temperature in this summer heat. So on these hot summer days we reach for a glass of cold water to quench our thirst - and what could be better than a simple glass of water? A glass of pure, filtered water - and some air conditioning too!

Refresh your home with clean water and cool air by calling Thursty Water Systems. We are licensed and certified in not only water filtration, but also electrical, plumbing, heating, gas, AND Air Conditioning, which means we are your one-stop-shop to keep you comfortable this summer season.

A Few Cool Tips for Around the House

Change incandescent light bulbs to compact fluorescent bulbs. Incandescent bulbs are less energy efficient and they produce more heat. Not only will this help to keep your house a bit cooler, but it will save you money too.

Remember to shut off heat sources such as the stove, lamps, TV and computer when not in use. You may be surprised how much heat these sources produce!

Avoid steam during the day. Wait until evening to shower, cook, and wash dishes or clothes. Make sure the door gasket seals on your oven, washer and dishwasher are in good shape with no holes or rips.

Adjust your pilot light. If you have a gas stove with pilot lights, make sure they are set correctly. If they are set too high, they will produce excess heat.

And of course, drink water! Vegetables and fruits are a great source of water too, and are perfect snack on summer days. You can also keep your freezer stocked with flavored ice treats!

WATER TRIVIA

Be the first to answer this month's trivia question correctly for a chance to win a Thursty Water prize! Send your answers to thurstywater@metrocast.net. We will notify the winner on **August 31, 2011**.

Q: Taking a bath requires up to 70 gallons of water, according to the US EPA. How many gallons of water are required for a five-minute shower?

June's Q: TRUE or FALSE- Groundwater can take a human lifetime just to traverse a mile.
Answer: True

Thank you to all who submitted answers. We appreciate your participation!

Wolfeboro Community Events

3rd Annual Stacey Burns Memorial Golf Tournament

All Proceeds to Benefit Children - Luncheon to Follow

Saturday September 24th at 8:00am

Kingswood Golf Club in Wolfeboro, NH

As members of the Wolfeboro Community, we support all organizations, and we are very thankful to live in such a giving community. It would be wonderful if all of our customers would consider participating in this event! If you prefer to not golf in the tournament, you can attend the luncheon and still show your support. Thank you in advance for your consideration and generosity.

Here are the details:

Hole Sponsorships are Available at \$100 per hole

There will be a Raffle following Lunch

Scramble Format

\$110 per Person - Kingswood Members receive \$25 Off

\$20 lunch only per person

Make checks payable to "Stacey Burns Memorial Golf Tournament"

Contact John Heyl at (603)455-3046 or Nikki Wilson at (603)833-3154

We hope to see you there!

-----Remember to Mark Your Calendars for these Upcoming Events-----

Annual Sidewalk Sale Days - **August 26th, 9:00am - 5:00pm**

Held at The Nick with the Wolfeboro Area Recreation Association

Family Fun day with inflatable events, climbing wall, bungee jumping, mechanical bull, face painting, mini golf, petting zoo, BBQ and more! Call 651-6605 or visit www.thenick.org for more information.

High Levels of Lead Discovered in Garden Hoses

Last week, NaturalNews.com posted an article that revisited a study regarding the discovery of lead commercially bought water hoses from popular department and home-improvement stores:

Allowing your kids to play with the garden hose, filling the inflatable kiddie pool, nourishing your garden with hose water -- these all seem like harmless activities. However, research is now proving otherwise. Many commercially bought water hoses contain dangerously high levels of lead which leech into the water flowing through them. In fact, according to Consumer Reports, water sitting in a garden hose that has been left in the sun can contain a level of lead that reaches 100 times over what is considered a safe amount.

Many garden hoses are made of PVC (polyvinyl chloride) - a toxic plastic - and lead is often used as a stabilizer in PVC. According to a special ABC report on Good Morning America, reporters from ABC's Phoenix affiliate KNXV-TV randomly purchased 10 garden hoses at places such as Wal-Mart, Target, Ace Hardware, and Home Depot. These reporters filled sections of the garden hoses with clean water, sealed the ends and put these hoses outside for about a day. The water was then delivered to a lab.

Five of the 10 hoses, or 50%, came back showing levels of lead much higher than 15 parts per billion (ppb), which is what the Environmental Protection Agency (EPA) deems safe for drinking water. Four of those hoses came back showing extremely high lead levels. The same report found that some garden variety hoses are leaking up to 20 times the amount considered safe for usage. Consumer Reports also tested 16 of the most popular hoses sold nationwide, finding that many leached up to 100 times the safe amount at the initial flush of standing water.
