Happy 4th of July!

JULY NEWSLETTER

This month, we **celebrate our rights and our freedom** within our community and across the country.

At Thursty Water Systems, we are continually thankful for the **right to have access to drinking water**, whether it's from the town, the lake, or a well in our own back yard.

We are also thankful for the **freedom to make things better**, especially for our customers.

This summer, we want to help you and your family by providing even better drinking water - because **you have a right to good health**.

NEW! Giving & Gratitude Program: Now when you refer a friend who schedules a service or installation of \$1500 or more, your friend will receive \$150 coupon towards their purchase. When their account is paid in full, we will credit your account with \$50 to be used toward your next service or installation. Call today and learn more!

Wolfeboro Community 4th of July Events

Bring your families and friends to celebrate with Wolfeboro during the annual July 4th festivities, starting with the **Annual Wolfeboro 4th of July Parade at 10:00am!** End the day with **Fireworks over Wolfeboro Bay at 9:30pm.** We are happy to live and enjoy our Wolfeboro community, and we hope to see you there! For more information about these and other upcoming events, visit www.wolfeborochamber.com.

WATER TRIVIA

Be the first to answer this month's trivia question correctly for a chance to win a Thursty Water prize! Send your answers to thurstywater@metrocast.net. We will notify the winner on July 31, 2011.

Q: TRUE or FALSE- Groundwater can take a human lifetime just to traverse a mile.

June's Q: American's use the most water each day by using what household necessity, than they use by doing any other activity?

Answer: Flushing the Toilet

Thank you to all who submitted answers. We appreciate your participation!

Thank You for Your Donations!

Thank you to all of those who donated to the Wolfeboro Area Armed Forces Support Group's Annual 4th of July Holiday Box Drive! The boxes were packed by the WAAFSG and community volunteers on June 16th, and were sent to our local military men and women serving overseas and here in the United States.

We are grateful for your continued support. Because of your generosity, our local military men and women will soon receive these boxes filled with your donations.

We would like to extend a special thank you to those who visited our showroom to drop off your donations.

Understanding Your Town's Consumer Confidence Report

If you are on town water or part of a community water system, you should have received the Consumer Confidence Report (CCR) for your local community.

The CCR is a document mandated by NH Department of Environmental Services to educate consumers about the quality of their drinking water including violations that may have occurred, the actions taken to rectify those issues, health effects of water contaminants, and important contact information for the community water system.

As always, we encourage you to be an educated consumer and review the informational brochure and table of water contaminants. The table outlines water testing as performed in 2010 along with the results. If you have any questions regarding your CCR, please contact your local community water system provider.

Drinking Water App - Cool Way to Track Water Intake

You may have seen our facebook post regarding the new Drinking Water Application for Androids: The application reminds you to drink water and successfully track your water drinking habits.

A few notes from an [article](#) regarding the app reminds us that:

- Water is one of the best tools for weight loss, since it's good for your diet.
- Drinking a good amount of water can lower your risk of a heart attack.
- Dehydration can sap your energy and make you feel tired
- Drinking water helps to hydrate and clear up your skin.

Just set the number of cups per day that you want to drink, and the application will remind you each day to drink those cups of water! ... And remember to find us on facebook if you haven't already!

Testing Your Water is Easy as 1,2,3... and 4!

Before you invite family and friends to your home this summer, why not test your water to be sure that what you're giving them is safe? By taking a few easy steps, you can find out what's in your water in less than one week!

Step 1: Stop by our showroom to pick up your free Water Test Kit. Each kit includes the bottles you'll need, the directions to pull your test, and a card that lists your testing options.

Step 2: Review the list of testing options and corresponding prices. Select your choice and fill out the information on the card. *Remember, all pricing is Lab Pricing only and we do not charge anything extra.*

Step 3: Pull the test! We recommend pulling your test from the bathroom faucet. Remember to take off the washer and use an alcohol swab to wipe down the faucet. After letting the water run per the directions in your kit, go ahead and fill up the sample bottles.

Step 4: Drop off your test kit at our showroom that same day. Remember, we can only accept samples Monday through Thursday until 3:30pm. Bacteria can die in 27-30 hours, so it's important to bring your test directly to our office. We'll check over your test to ensure that you have filled out the necessary information and pulled your water sample correctly.

Next: Let us do the rest! We typically receive results in about three business days, and will forward your results directly to you. If there are any concerns with your water quality, we will put together a customized analysis with recommended solutions.

MVSB Can Help Finance Your Water System Install

Meredith Village Savings Bank can help finance your water system. Call for details!  *Good neighbors you can bank on*
