Thursty Water Systems Seminar Update

On September 17, 2009, Thursty Water Electrical, Plumbing & HVAC offered a free seminar regarding vital information for home buyers and sellers. The seminar addressed water quality issues that could delay home closings, such as arsenic, radon, and bacteria. Attendees enjoyed refreshments and received an exclusive packet of information regarding many water quality issues, health concerns, their solutions, estimated costs, and associated timelines. We had a great turnout! For your convenience and at the request of others, Barbara Thurston, our Educational Director will be contacting Real Estate Offices throughout New Hampshire to schedule an on-site informational session on this topic.
