will gladly schedule maintenance if you have an existing system.

Whether you're on town water, well water, or you pull from the lake, Thursty Water Systems can help you enjoy that cool, refreshing glass of clean water this summer, without the bottles, the cost and hassle of disposal.

Conserve Water in Your Home

Breaking the bottled water habit is a substantial way to save money and reduce waste. You might be surprised to learn more about how much water you use in your home, and some additional ways to break the habit of excess water usage.

Did you Know:

- One leaky faucet can waste 100 gallons of water a day.
 - One flush of an older toilet can use between 3.5 to 5.5 gallons of water.
 - An average family of four uses 881 gallons of water per week just by flushing the toilet.
 - Turning off the water while brushing your teeth saves 3-5 gallons of water per day.
 - The average 5-minute shower takes about 20 gallons of water.
- If everyone in the United States could manage to use just one less gallon of water per shower every day, about 85 billion gallons of water could be saved each year.

How important is Emergency Service?

Think about it: What do you consider to be an emergency situation in your home? If you have no water, your pump fails, or your basement floods... these are only a few emergency situations that immediately affect your family and your home.

Emergency service is important for your safety, health, and peace of mind.

When an unexpected situation arises, it is important to trust that the issue will be addressed with efficiency and quality workmanship.

Not only do our office staff and technicians work hard to ensure that our customers' needs are addressed as soon as possible, but we guarantee and warranty our work. With over 25 years of experience, current licenses, certifications, and insurance, we work to ensure our customers' satisfaction.
