

***The Flying Artist* – Merv Moriarty**

Merv Moriarty's beautiful hand made book *The Eye's Mind - the artist and the draftsman* is receiving praise and recommendations across Australia after the success of the launch at The National Library of Australia, formally opened by His Excellency Mr Michael Bryce AM AE earlier this year.

“I can't help thinking that Leonardo would have liked this book – it leaves us in no doubt that he (Merv) is the master of his craft...The narrative is about perception of proportion and space and the “mind's eye' ability to evaluate such things – and it is about philosophy and the architecture of nature...outstanding scholarship on this new work...” His Excellency Mr Michael Bryce AM AE

Merv, known as *The Flying Artist* is an Australian icon, a courageous man with the tenacity for fulfilling the vision he had. He has woken people to their own desire and need to seek the creative and the beautiful within and around them.

"Over the years I have been surprised just how many artists whom I have met who at one time or another have been exposed to and inspired by Moriarty's teachings...This is a sincere, committed and well written book by a passionate teacher whose inspiration has touched many...a valuable and alternative voice in the Australian art education scene.” Sasha Grishin - Art critic Canberra Times and author.
