

## Many enthusiastic responses come in after each workshop

'Merv's sensitive and thoughtful Colour Mixing System is a perfect blend of creativity and science - it's very practical! The functions of the colour wheel were demonstrated one by one during Merv's Colour workshop and, clearly, it's the intelligent result after years of thought and practice. I don't think I'll be using my conventional colour wheel any longer. The fact that the Colour Mixing System is based on the light spectrum is especially relevant because I think there's finally an explanation to the science behind colour mixing.' Ozlem Guler

"I recently attended one of Merv's Colour Workshops and I can highly recommend attending one to any artist wanting to experience colour in a way not experienced before. Merv's new "Colour System" is a paradigm shift and I cannot wait to get my copy of his colour tool found in his new book. I believe his new book on Colour soon to be launched will be known as "The book" on colour by artists and colourists in the future. Thank you again Merv for the wonderful learning and mentoring. I will never look at nature the same way again. Beverly Spiller

Hi Merv, I just want to say how much I enjoyed the workshop last weekend and feel I have finally been enlightened. I completed 3 small paintings yesterday and they have the Ah! factor. I'm just about to head out to the mountain to attempt another, this time with rocks, which will add nice curves to my straight line analysis. I also tried the black and white studies which helped a lot. You definitely have a gift and I thank you for sharing your discoveries with us.

Artfully yours Kathleen McCue

Dear Merv  
I felt privileged to share your workshop and thank you for your wisdom insight and patience. I loved every second of your course, and hope to be in your 2013 forthcoming Melbourne workshop.  
Andre Lloyd

The colour workshop was so perfect for me on every level including the timing. Also, I'm so happy to have met the very special Merv Moriarty. What a treasure. It's the best way to learn about the beauty of colour from someone who obviously cares so deeply about it and people.

## About the two day COLOUR Intensive Workshop

This workshop is suitable for new and experienced artists; no drawing or painting ability is required. All colour exercises use a simple format or colour sketches.

In these workshops I do not simply lecture on colour theory, although some lecture and demonstration time is essential to cover and explain fundamental principles of colour.

By far the greater learning experience realised in these workshops comes about as an active hands on discovery that you will share with the other participants. Much of what you learn about colour will come from guided research into the important things about colour that you individually and the group collectively will undertake.

Understand the essential nature of colour, with attention to the intriguing relationship between colour as light and colour as pigment and how this affects colour relationship.

## INNOVATION!

### Moriarty Three-Section COLOUR Wheel & Plotter

Easily get the colours you want: no more guessing! Rotate the plotter around the Moriarty Three-Section Colour Wheel to find accurate combinations of colours. Instructions and video clearly explain the method.

Identify satisfying colour relationships. Use the Plotter to identify paths between colours. These ranges of colour provide satisfying colour choices, that represent all visible light, without the chaos of using too many hues.

Plus: principles of colour and colour mixing, selecting your palette and using a broad selection of pigments.

This innovative colour tool is an essential for artists, designers, printers and teachers, in fact anyone working in colour!

### COLOUR – the definitive guide

Merv Moriarty has written and illustrated this 350 page book, covering colour from the artists and designers perspective, based on science and research over five decades.

The book reveals Merv's original theories about colour as light, colour as pigment and the principles underlying Three-Section Colour Wheel and HTP Colour Identification foldout (3240 colours). His original theories covering interval and linkage and his work with thousands of students, proves that "right colour" is objective, not subjective. This book will open a world of possibilities in colour and take your work to new heights.

*Merv Moriarty's, influence on art in Australia has been profound. His vision in starting the flying art school (now Flying Arts) in 1971 is legendary and his influence on many artists continues to this day. Moriarty, also a professional artist, has for over forty years experience to be one of the most highly respected art educators in the country.*
