

SECURITY NEWSLINE

Official Newsletter For Customers And Pro-Partners of

November/December 2014 Holiday Edition

Selectronic Security Group 2429 Eastbrook Rd New Castle, PA 16105 888-695-7277 www.SelectronicSecurityGroup.com

SECURITY NEWSLINE is our bi-monthly newsletter created to educate, inform and entertain our security customers and ProPartners. Each issue includes a mix of security tips, interesting facts, product features, testimonies, knowledge base, and more. We hope you enjoy this edition. Visit our website at: www.SelectronicSecurityGroup.com for more information. Thank you to our customers for your business and our ProPartners for your continued referrals.

Al Cochran
Managing Partner

During the Christmas holidays more and more people are shopping on-line due to convenience and their busy schedules. This creates a huge opportunity for crime as parcel delivery services leave packages on doorsteps when no one is home. These are easier to steal than packages and gifts left in cars as thieves have been known to follow delivery trucks. When possible schedule deliveries for times when you are at home or make arrangements to have your parcels delivered to a neighbor if you are unable to be at home.

Knowledge Base:

What is CAT5 wire? This is an Ethernet network cable standard which contains four twisted pair of copper wire and supports Fast Ethernet speeds up to 100Mbps. CAT5 wire can pass data, video and power over the four pair of wires. We use CAT5 wire in many surveillance camera systems to provide power and crisp video images from the cameras to the Digital Video Recorder or Network Video Recorder.

Our new, color, surveillance camera system stickers are in.

If you had one of our camera systems installed and need stickers just give us a call at **888-695-7277**.

If you have installed one of our affordable security systems did you receive your *Certificate of Installation* so you can get your Home Owners insurance discount? Depending on your insurance company, you could receive a discount between 10%-20%.

Is Your Cell Phone A Deadly Distraction? Between 2001 and 2007, drivers distracted by talking or texting on cell phones killed an estimated 16,000 people. In 2008, deaths attributed to distracted driving increased 15.8%. today, road fatalities increased 19% for every one million cell phone users. 30 states ban texting while driving and some cities and states require hands-free devices for using cell phones.
