

Open the door to your *Destiny*

ThyssenKrupp Access Manufacturing, LLC

ThyssenKrupp

Welcome To Your Destiny

You are now among thousands of homeowners discovering the value and convenience of a residential elevator. As you know, multi-level homes are becoming ever more popular as they offer your family additional square footage without losing precious lot acreage. However, the idea of transferring luggage, laundry, groceries, or even yourself up and down a flight of stairs day after day, often results in the scaling back of one's home plans.

We suggest that you don't hold back! Build the home of your dreams...expand up as far as your imagination will allow...and then invest in a Destiny Residential Elevator to take you to any level of your home with elegance and ease.

Your Destiny comes standard with an accordion gate up to 6'8". Optional accordion wood veneer gates are available in Birch, Oak, Maple, Cherry, or Hickory.

Rustic Bronze

Silver Vein

Copper Vein

White

Black

Brass

Enterprise Gate

Our optional scissors gates are available in a variety of finishes, including black, white, copper vein, silver vein, rustic bronze and brass. The Enterprise gate is also available as an option with finishes of brass, black, or white.

Wood Products and Light Fixtures

Birch

Oak

Maple

Hickory

Cherry

Oak, Birch, and Maple are offered as standard wood panels. Hickory and Cherry are provided as optional woods with other varieties

available upon request. Wood is a natural product and every piece is unique. Therefore, differences in color, contrast, density, and grain patterns between samples and the final product are expected. Each wood product comes unfinished allowing you to match stains and finishes to your home's decor.

Every car is available with a choice of black or white recessed lights, or globe light.

To personalize your Destiny residential elevator, your wood car panels and/or car operating panel can be engraved.

Standard Features

- Finished Wood Panels (Stained and/or Clear Coated)
- Custom Wood Choices
- Light Oak or Dark Oak Flooring
- Hickory or Cherry Hardwood Panels for Level III, IV, V, and VI

Personalized Service

ThyssenKrupp Access is operated within the United States. We are dedicated to superior design, quality manufacturing, unrivaled customer service, and personalized customization. We continue to be an active participant on the various Safety Codes and Standards Committees that govern our industry.

We are dedicated to making your choice a well-informed decision and allowing you to choose the product that best fits your application. Our fully-trained staff and authorized dealers are ready to assist you with any questions that may arise as you consider your options.

We stand firmly behind our product line, offering an *Industry Leading 3-Year Parts Warranty* on every Destiny Residential Elevator. Each and every Destiny Residential Elevator is designed and manufactured to the owner's unique and exact specifications from the initial drawings to the final installation.

When purchasing a Destiny, you can rest assured that your residential elevator has been designed to make life easier for your #1 priority: your family. Likewise, your Destiny Residential Elevator has been designed to add function, value and elegance to your most important financial investment: your home.

Thank you for considering the Destiny Residential Elevator.

Drive Systems

The Destiny offers you the choice of two state of the art drive systems, the Roped Hydraulic and the Winding Drum. Each system gives you the flexibility to select the best drive for your application.

Roped Hydraulic

- 1:2 cable/roped hydraulic unit utilizing (2) 3/8" - 7 x 19 steel core prestretched aircraft wire rope integrated into a rams header sheave mounted to an 80mm diameter hydraulic cylinder
- 950 lbs capacity up to 44' (750 lbs opt.)
- 2 speed valve
- Remote machine room up to 40'
- Submerged motor for quiet operation
- Floor specific battery descent
- 40 fpm travel speed

Winding Drum

- Inverter controlled winding drum unit utilizing (2) 3/8" - 7 x 19 steel core prestretched aircraft wire ropes
- 950 lbs capacity standard (750 lbs opt.)
- A variety of drum configurations available
 - Rail Mount Drive (RMD), Fig.A
 - Behind the Rail, Fig. B
 - Reduced Machine Room (RMR), Fig.C
- Variable speed for a quality ride
- No oil usage/reduced maintenance
- Floor specific battery descent (opt.)
(Standard on the RMD)
- 40 fpm travel speed

Fig. A

Fig. C

Please refer to our *Destiny Design Guide* for more detailed information on our drive systems.

Specs and Drawings

Pit = Minimum of 6" (std. 8")
 Travel = Up to 50'
 Overhead = Minimum of 96"
 (RMD 111")

*Configurations with above dimensions provide a car size of 36"x 48". Custom car sizes are available.

Note: Separate machine space is required. For construction purposes, please contact your local dealer for detailed drawings.

* Contents are subject to change without notice.

PART 1 GENERAL

- 1.01 **Description of product:** Residential elevator with inverter controlled winding drum drive or 1:2 roped hydraulic drive.
- 1.02 **Work Included:** Furnish all labor and materials, equipment and incidentals necessary to assemble and erect a residential elevator.
- 1.03 **Work by Others**
 - A. Construct a hoistway of the size and backing required by the manufacturer.
 - B. Construct a machine room.
 - C. Provide system to maintain hoistway and machine room within 50 - 90 degrees Fahrenheit for the hydraulic drive and 33 - 100 degrees Fahrenheit for the winding drum drive
 - D. Provide 230 VAC, single phase, 30 amp dedicated and 120 VAC, 15 amp dedicated circuits to machine room space for elevator and car lighting.
- 1.04 **References**
 - A. American Society of Mechanical Engineers/American National Standards Institute (ASME/ANSI) publications: ASME/ANSI A17.1 "Safety Codes for Elevators and Escalators", Section 5.3.
 - B. National Fire Protection Association (NFPA) publications; NFPA 70 National Electrical Code.
- 1.05 **System Description**
 - A. Travels up to 50', with up to 6 stops.
 - B. Load capacity of 950 lbs. (750 lbs. opt.)
 - C. Speed of 40 fpm.
- 1.06 **Quality Assurance**
 - A. Installer Qualifications: A company experienced in the assembly and erection of lifts and residential elevators of the type specified.
 - B. Manufacturer Qualifications: A company specializing in the manufacture of residential elevators and lifts for the disabled.
- 1.07 **Warranty:** Unit shall have a three (3) year limited parts warranty.
- 1.08 **Maintenance**
 - A. Maintenance of the private residential elevator shall consist of regular cleaning and inspection. Maintenance is recommended every 6 months.
 - B. Inspection: ASME A17.1 requires all private residential elevators to be inspected every 12 months.

PART 2 PRODUCTS

- 2.01 **Manufacturer:** ThyssenKrupp Access Manufacturing, LLC
- 2.02 **Components**
 - A. Car:
 1. Size 36"W x 48"D x 86"H (others available).
 2. Enclosure: Securely fastened to the car frame and platform. The car shall be constructed of a minimum 3/4" wood walls. Floorboard shall be constructed of 1" AC plywood.
 3. Gate: Accordion or scissors type equipped with a positively opened mechanical switch to indicate that the door is closed. Scissor type gates shall also be designed to prevent car movement if the gate is moved up or down due to any protruding objects encountering an obstruction.
 4. Handrail provided.
 5. Automatic interior lighting provided.
 - B. Hoistway Door: Size 3'0" W x 6'8" H swing type (to be provided by others).
 - C. Drive System: Two speed inverter controlled drive, winding drum or 1:2 roped hydraulic with 2 speed valve.
 - D. Suspension System: (2) 3/8" 7 x 19 prestretched aircraft wire rope
 - E. Guide Rail: Shall consist of two 6 1/4 lb tee rails.
 - F. Car Frame: Shall be equipped with non-metallic faced roller guide wheels.
 - G. Leveling device: Provide hall effect sensor system to maintain car within 1/4" of the landing.
 - H. Control Systems: Non-selective collective or single automatic push button PLC; U.L. certified.
 - I. Motor: 3HP, 1750-RPM 208/230 VAC single phase, (three phase with inverter for winding drum)
 - J. Wiring:
 1. Provide flexible traveling cable for electrical light and controls in car.
 2. All other electrical wiring shall be insulated, flame retardant and moisture proof.
 - K. Safety Devices:
 1. Stainless steel slack rope device.
 2. Terminal stopping device.
 3. Platform toe guard at the car entrance.

PART 3 EXECUTION

- 3.01 **Installation**
 - A. All components shall be assembled and erected in strict compliance with manufacturer's printed instructions.
 - B. All wiring shall be in accordance with the wiring diagram furnished by the manufacturer.
- 3.02 **Field Quality Control**
 - A. Static/Running Load Test: All load rating and safety factors shall meet or exceed those specified in ASME A17.1.

*Providing our partners unequalled value by offering products of the highest quality,
 complemented by unrivaled customer service*
