

# Rise

Thankfully,  
installing a  
home elevator  
now requires  
one less tool.

ThyssenKrupp

## Introducing the Rise.™

Adding an elevator to a home was once loud, backbreaking work. It meant digging “pits” to accommodate traditional elevator hardware. That was, until ThyssenKrupp Access created the Rise, the only pit-less residential elevator in the country. The Rise has been engineered from the ground up to sit right on the first floor, with no need for a pit. That means no jack-hammering cement out of your basement. The Rise makes for one of the most widely applicable elevators in the world.

## Home value, now going up.

Not only is installing the Rise in an existing residence easy, adding it to your home can add lasting value. In fact, a residential elevator can increase the property value of a home by as much as 10%. That makes it a great long-term investment for your home. It can also bring more “talk value” to a property. There’s just something to be said about a home that features such a unique and functional amenity.

## Why climb when you can Rise?

Stairs are impractical when it comes to moving furniture or hauling loads of laundry up and down. Let the Rise do all the heavy lifting. In fact, it has a lifting capacity of 950 lbs. and can span up to five stories. And when it comes to efficient use of space inside a home, the Rise takes up as little as one-fourth the square footage of a staircase. Got room for a closet? You’ve got room for the Rise.

## Accessibility when you need it.

The Rise brings a higher level of personal accessibility to any home. For homeowners with limited mobility, the challenge of navigating a staircase can seriously hinder their freedom. In such cases, a home elevator is more than a luxury — it’s a necessity. The Rise is a great long-term solution for those planning to remain in a residence for many years, ensuring they’ll always be able to use the entire home.

## Sure it goes up, but it also blends in.

Available with a Counterweighted Chain Drive, the Rise has installation options to fit almost any plan. It is equipped with all the safety features you'd expect, including door interlocks, cable safety devices, emergency lights, alarm and phone. It also has features you might not imagine in a home elevator, like beautiful wood walls, brass or stainless steel accents and three car sizes. In fact, with seven different wall finishes to choose from, it's easy to make the Rise part of any décor.
