## CENTURYII

## Gomplimented by Comparison.

Century II . . , the industry's proven leader:

Sealed Oil Bath Drive The sealed oil bath drive adds years of life to the drive chain and sprocket as a result of constant self-lubrication. 12" model includes fabricated steel housing for oil bath. All drivelines are solid steel and supported by low maintenance sealed bearings.

## High Capacity

Discharge
Optional discharge spouts and accessories are available to meet your operational needs. Heavy throughout will result in years of trouble free service.

Elevates and Lowers Smoothly
Elevates and Lowers Smoothly
The undercarriage slides on four nylon The undercarriage slides on four nylon
rollers for smoother operation and reduced winch load. The dual angle iron track is welded to the tube for additional strength on the $6^{\prime \prime}, 8^{\prime \prime}$ and $10^{\prime \prime}$ models. A box channel is used on the $12^{\prime \prime}$ model.

Galvanized Finish The main tube of the CENTURY II is a durable galvanized finish. cable with trussing id in supporting he main auger.

Wide-Based
Undercarriage Design Undercarriage Design
Hutchinson's wide wheel base design and scissor type undercarriage and scissor type undercarriage
constructed of high strength round constructed of high strength round
tubing means greater stability during operation or while being towed. The
and tapered roller bearing hubs permit increased towing capability.

When quality counts, Hutchinson delivers with the most impressive collection of operating and construction features available on any portable grain auger today. Compare for yourself:

## Additional Options

- Internal bearings on 6 ", 8 " and 10 " models. Standard on 12".
- Heavy gauge flight on 6 ", 8 ", 10" and 12 " models.
- Heavy gauge tube on $10^{\prime \prime}$ models.
- Corn screens available on 8 " and 10 " models.

Choice of Drives
Your choice of PTO or Electric Drive (Electric not shown). The PTO drive can be driven from either side of the auger A shear mechanism is incorporated in the PTO driveline for component protection. A band-on support provides a convenient method to carry the driveline during transport.

Hutchinson Century Augers of Agricultural and Biological Engineers Standard - Safety for Portable Agricultura Auger Conveying Equipment.

 Maximum
Capacity Intake Capacity intake
The auger intake design provides maximum capacity and safety. Heavy duty flighting maximizes screw life.

## Manual or

Powered Lift System
Powered Litt System
A manual winch is standard
equipment with labor saving
hydraulic or electric winch
hydraulic or electric winch
winch standard on $12^{\prime \prime} \times 71^{\prime}$ \&
81' models.
