DETAILED COURSE DESCRIPTION: Improperly dealing with human waste can cause serious risks to the OSTDS professional and their client. This course will discuss the risks associated with the OSTDS Industry. Attendees will be able to leave course with a better understanding on how to mitigate the risks associated with OSTDS. Additionally, tools will be shared to aid in the development of a safety program and the Best Management Practices (BMPs) necessary to implement the program. All attendees must take an exam. Masters must pass exam to receive Master credit.

Instructor: Roxanne L. Groover 4(B)
