

Safety Support Services, Inc.

George Evans & Associates, Inc. has teamed up with Safety Support Services, Inc. to offer an affordable safety program for small to medium size businesses

WHY SAFETY? HOW IS IT IMPORTANT?

Not only is safety required by Law (OSHA), but it is also required by Case Law. Every negligence case will turn on the issue of safety. A safety program makes your position defensible. The employee must prove that their Employer was negligent to recover damages. This is especially true for non-subscribers.

AN EMPLOYER'S DUTIES ACCORDING TO CASE LAW:

1. Employers **must** provide reasonably safe place to work.
2. Employers **must** make sure that there are enough workers for a particular task, to ensure the Safety of all.
3. Employers **must** hire Safe, careful and competent Employees.
4. Employers **must** furnish and maintain Employees with Safe, suitable tools, appliances and personal protective equipment (PPE), as required.
5. Employers **must** train Employees in the Safe way to do their job. Safety rules **must** be posted and enforced.
6. Work Place hazards **must** be identified.

FACTS CONSIDERED BY JUDGE OR JURY IN A NEGLIGENCE ACTION:

1. What **duties** were owed to the injured Employee?
2. What **duties** were breached by the Employer?
3. What **injury or damage** was incurred by the Employee
4. What was the **proximate cause** of the injury or damage?
