Cases 20-5854 (Original Case 3:20-cv-298) & **21-5249** (Original Case 3:20-cv-579)

**Re: These Cases Will Fix the
U.S. Postal Service, and More**

Dear Judge Sutton,

Since May 2020, my public safety appeals case 20-**5854** has awaited processing by your Court. 5854 provides proven low costs second & third treatment options for those who fear the COVID vaccines. These options, such as zinc & Vitamins C + D, can help to stop the COVID pandemic. In addition, 5854 seeks to end the **three antitrust violations** causing the U.S. debt crisis.

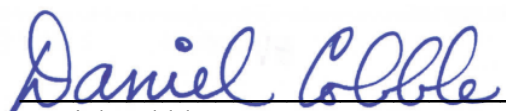

Regarding case 21-5249, stopping said antitrust violations will restore the U.S. tax base to repeal (terminate) the unconstitutional **2006 Postal Accountability & Enhancement Act (PAEA)**. In turn, this will return financial health to the U.S. Postal Service (U.S.P.S.). PAEA was passed to raise postal prices to pay for the pensions and healthcare for postal workers. Prior to 2006, these funds were taken from the healthy U.S. tax base. No problem. However, since 1999, intrusion of the antitrust violations has diminished the tax base.

But PAEA, too, is not working. The Postal Commission regularly raises prices on stamps & services, scales back services, while reporting losses in the \$billions every quarter. At this pace, eventually a first-class stamp for a 1oz. letter, **currently at .58¢**, will cost \$1.00. But restoring the tax base by stopping the antitrust violations will remove the pension & healthcare overhead expenses from the postage we pay. In turn, postage prices must return / decrease to the normal pricing structure of 1999 while normalizing the traditional postal services (**such as one-day mail, etc.**).

And whereby Judge Sutton, pursuant to my pending motions, I implore the court to allow 20-5854 and 21-5249 to go forward for addressing these crises. If not, then the U.S.P.S. can only continue with ever-higher prices and degraded services.

For your ready-reference, I included a 1-page "consent decree" summary w/ footnotes of the three antitrust violations and page 13 from the 2nd Amended Complaint in case 5854 / 3:20-cv-298 that illustrates the other damaging social effects of these violations.

Respectfully submitted,

Daniel Cobble

– Action for “Consent Decree” to Correct the 3 Antitrust Violations –

Federal Case 3:20-cv-298. The \$transfer-of-wealth causes ever higher debt and social deterioration that threatens economic depression: ¹

- 1) **Reinstate** provisions **of the Glass Steagall Act of 1933** that was repealed / terminated in 1999 by Pres. Clinton & the Republican Congress. Since 1933, Glass Steagall had prevented derivative and hedge fund traders, etc. from placing bank accounts & other consumer accounts at risk. The court reinstating provisions of Glass-Steagall will “once again” allow people to safely deposit their monies into banks and other institutions, and for reasonable rates-of-returns on \$interest rates. By restoring the safety of foreign & domestic \$deposits, the economy energizes with minimal debt to banks that are protected from “receiverships” (run on banks) that led to the 1930s Great Depression.
- 2) **Reinstate the competitively higher prime interest rate** (proposed at 4.75%). Consumers and small business loans will then once again become attractive to banks. The too low **Fed (Federal Reserve)** prime rate, today at 0.25%, reduces economic activity and tax revenues because it chases dollars away from U.S. communities in search of higher \$returns. And it discourages banks from lending to “retail consumers & small businesses” to, instead, earn more from the larger “corporate loans.” Even though [loan] capital to consumers and small businesses is the primary engine of the economy. These two conditions require ever-more borrowing from the Fed, and thus higher taxes & fees to make-up the economic losses. ²
- 3) **Stop the illegal Fed loans to investment bankers** (Merrill Lynch, Berkshire Hathaway, Etc.). **On May 2, 2008**, then Fed Chairman Ben Bernanke announced that “investment bankers” can now borrow directly from the Fed (today at 0.25%) in violation of the **Federal Reserve Act of 1913 (FRA)**, Section 13, clause 2. Every year, this practice removes \$trillions from “commercial sector circulation” for direct, illegal entry to the “financial sector” (Wall Street corporations) that prevents “dollar monetization.” To make-up for these economic losses (transfer of dollars), similar to “too low interest rates,” we borrow more from the Fed that then forces constant tax & fee hikes, and cutbacks on vital programs. It reduces the U.S. tax base that brings us ever closer to economic depression. ³

¹ **A.** Reversing the \$transfer-of-wealth will immediately begin to restore the “organic” U.S. tax base of 1999 at the federal, State, & local levels that minimized borrowing from the Fed. These corrections are needed to restore funding to housing, education, national defense, the U.S. Postal Service, infrastructure (inclu. street repaving), climate change, etc. **B.** Americans should demand **Offices of Infrastructure** at all three levels of Gov’t to ensure their tax dollars follow the actual projects for maintenance and new construction projects. **C. The Infrastructure bullshit from Congress.** Simply put, we cannot borrow enough for infrastructure because it costs too many \$trillions to catch-up. Funding must come from the balanced dollar of 1999 that produced tax surpluses (and won the Cold War against Russia, and needed for China today).

² **Home prices.** The higher competitive rate will chase away “speculation investors” from housing, resulting in lower prices for family homebuyers. This same condition will reduce apartment rents, too.

³ “Monetization” is increases in the value of dollars as they exchange hands in the commercial sector.

The Extreme Cost of Borrowing from Fed When Rate is Too Low

The transfer-of-wealth to Wall Street corporations & foreign investors is caused by **the three unlawful policies** explained herein Sec. C. They violate the Federal Reserve Act (FRA), as well as antitrust violations by restricting trade.

\$25.7+ trillion national debt today

A **too low rate** (0.25) withholds/chases \$\$\$ from **commercial sector**, requiring ever more borrowing from the Fed.

Results in: Ongoing losses of disposable income, growing poverty & homelessness, food insecurity, high rents & home prices, **routine increases in taxes & fees**, ever growing Government debt, no money for education, infrastructure, climate change, etc.; threatens Social Security, Medicare, pensions; most other funding programs affected; and

... cause of U.S. foreign policy falling apart (after Clinton economy) due to foreigners/nations no longer heavily invested in U.S. by the dollar's low value today.

\$100 billion surplus 1999

A higher rate attracts \$\$\$ into the commercial sector for minimal borrowing from the Fed (propose 4.75% today).

Figure 1 • The transfer-of-wealth makes slaves of us all because our taxes are paid into the "black hole" of the extreme, **UNPAYABLE** debt that it creates. This "circular debt" requires ongoing hikes in taxes and fees.

TODAY'S IMPROPER DISTRIBUTION OF RESERVES (dollars) BY U.S. FEDERAL RESERVE

Commerical Banks/ Commercial Sector

- Consumers
- Small Businesses

1999 & after

Financial Sector

- Wall Street Corporations
- Foreign Investors

Wholesale capitalism

Federal Reserve Act (**FRA**) of 1913 require all reserves to be issued through the Commercial Sector for "more equal distribution" to everyone. (See Section 13, Clause 2 in Figure 2)

prime interest rate: 0.25%

Figure 2

American free enterprise

PROPER DISTRIBUTION OF RESERVES (dollars) BY U.S. FEDERAL RESERVE

Commerical Banks/ Commercial Sector

- Consumers
- Small Businesses
- Wall Street Corporations
- Foreign Investors

1999 & before

Financial Sector

"Powers of the Federal Reserve Banks . . . shall not include notes, drafts, or bills covering merely investments or investment securities . . ."
(FRA, Section 13, Clause 2)

Today's faucet to the financial sector should be turned-off so private investors must compete for dollars the same as everyone else since before 1999.

prime interest rate: 5.46%

Help Stop the "15% Global Minimum Tax" (GM tax)

Congress has no constitutional authority to tie U.S. sovereignty to the GM tax. Yet still, reversing the three antitrust violations to restore the U.S. tax base will eliminate the need for the GM tax, since all other nations will regain access to the U.S. dollar, too. **See 1999 tax surplus in Figure 2**, "Proper Distribution of Reserves (dollars) . . .," when the tax base was normal.

Thus, stopping the GM tax is another reason to mail-in your signed letter to Judge Sutton, other elected officials, and throughout your community.v

Taxpayers' Annual Taxes Paid to

BALANCE SHEET

Federal Reserve Debt (Over \$3 trillion / 50% of collected taxes & growing)

1. Total estimated tax collections in 2018 based on Congressional Budget Office report of \$1.5 trillion collected in first quarter (4 x \$1.5 = \$6.0 tril.).

\$6.0 trillion

2. U.S. Budget for 2018

- 4.2

3. Taxes that exceeded budget paid to debt

\$1.8

4. Additional taxes taken from budget
\$outlays to pay down (service) debt

+1.2

real dollars
from taxpayers
that increase w/
tax & fee hikes

5. **Total taxes paid to U.S. debt in 2018**

\$3.0 trillion

Jan. 2022 total debt = **\$28.9 trillion**; it grows even though repaying \$trillions every year (as "circular debt")

6. Total estimated tax collections in 2018 based on Congressional Budget Office report of \$1.5 trillion collected in first quarter (4 x \$1.5 = \$6.0 tril.).

\$6.0 trillion

7. **Total taxes paid to U.S. debt in 2018**

- 3.0 50%*

* 8. Total taxes applied to U.S. budget

\$3.0 trillion

9. Loans from Fed. Reserve applied to U.S. budget
(U.S. borrows approx. \$1 trillion every 10 months)

+1.2

taken from rate of
debt growth in one year

10. Total taxes + loans funded U.S. budget in 2018

\$4.2 trillion

* "Total taxes applied to U.S. budget" gets smaller every year while debt grows (see Item 5, above). This circular debt / constant borrowing is due to three antitrust violations by the Federal Reserve since 1999 (see fed. lawsuit 3:20-cv-298). Eventually, budget cannot sustain \$obligations, leading to economic collapse. –

- **Solutions:** STOP the antitrust violations; replace Federal Reserve with "Office of Commercial Contracts" for commercial banks within U.S. Treasury Dept (required by U.S. Constitution).

Daniel Cobble Running for Congress, U.S. Representative (Louisville, Dist. 3)

John Yarmuth
Retiring

"My priority is the security of communities of which both parties are failing. I wrote two books (on healthcare & immigration) and fighting five (5) lawsuits in the courts. If elected to the U.S. Congress **to replace Rep. Yarmuth**, my work will have the national platform to push politicians to straighten-up. So please register to vote for me in **the 2022 Republican primary race on May 17, 2022.**"

Thank you. – Daniel Cobble

Cobble's Partial Bread-n-Butter Agenda for Congress:

1. Protect "vote counting" in neighborhood voting precincts (**see lawsuit**) –
2. Reduce crime & violence by promoting fatherhood for families –
3. Reduce taxes by stopping the \$transfer-of-wealth to Wall Street corporations. We cannot fund fixing global warming without stopping this \$transfer (**see lawsuit**) –
4. Fix the U.S. Postal Service (**see lawsuit**) –
5. Stop the border crisis with transactional migration for U.S. employers (**see Cobble's book**) –
6. Fix healthcare with *Universal Equity-based Healthcare*; covers everyone (inclu. homeless) while reducing taxes & costs with system of cost-sharing (**see Cobble's book**) –
7. Fix public schools with "neighborhood schools" and "system of parental aides" to teachers (requires ending busing; bus drivers may join school staffs) –
8. Incorporate **no fee childcare** into public schools with parental aides; certify middle & high school students in childcare courses –
9. Apply ***carbon circulatory redirection program*** (CCRP) now to reduce global warming & pollution (until green economy develops; introduced in Cobble's transactional migration book) –
10. Reign-in China **and** Russia by normalizing Fed prime interest rate (recomm. 4.75%, **see lawsuit**) –

We cannot realistically address climate change **or** road infrastructure, **Etc.**, until stopping the \$transfer-of-wealth to Wall Street corporations. This problem is causing the constant borrowing from the Federal Reserve.

Cobble's election to Congress will bring his lawsuits to a national platform to fix this problem.

See Cobble's 16-point agenda at The-Protect-America-Project.org & Prose-Litigants.org

– Keep this information for Election Day –
